

How to Build a Wine Cellar

January 15, 2009, 5PM, Center Club, Baltimore, Maryland

Our discussion will feature Lou Hogan, owner of Vintage Cellars of Maryland, a builder of elite wine cellars throughout the region. Vintage Cellars of Maryland is dedicated to creating custom wine cellars that will enhance the beauty and value of any wine collection. They specialize in climate-controlled and non-climate-controlled installations for wine storage in both residential and commercial properties.

Some of the topics that will be covered in this discussion include:

- At what point should you consider installing a wine cellar?
- Where are the ideal locations for a cellar?
- How should a wine cellar be constructed taking in to account climate control, humidity, lighting, types of racking systems and other factors?
- What happens when the hobby turns into a great investment?
- How would you sell your investment if need be?

We will provide light hors d' oeuvres, beverages and free, private parking at the Center Club. Business attire is mandatory, no jeans.
